A Message from the Principal

I am proud to share the achievements of Delhi Public School, Panipat Refinery, over the past year. Our dedication to holistic education and the adoption of the UN theme 'Planet vs. Plastic' have been central to our progress.

At DPS Panipat Refinery, we believe education goes beyond the classroom, focusing on the intellectual, emotional, social, and physical development of

our students. Our environmental initiatives, aligned with the "Planet vs Plastic" theme, include clean-up drives, recycling campaigns, and experiential activities, fostering responsibility and awareness in our students.

Our students have excelled in various academic, sports, and cultural activities, both within and outside the school, showcasing their talents and embracing healthy competition. We also prioritize their personal and professional growth through guidance programs, internships, and expert interactions. Additionally, our faculty's continuous development through workshops and seminars enhances their skills and knowledge.

Our students and staff have earned numerous accolades, bringing honor to the school. Looking ahead, we will continue to advance holistic education and sustainability efforts while introducing new opportunities for our students to thrive.

Congratulations to the editorial team for producing a visually appealing E-magazine that highlights our school's activities and achievements, providing a platform for budding writers and artists to showcase their talents.

Surender P. Sachdeva
Principal
Delhi Public School
Panipat Refinery

Student Editorial

With prolific pride we proclaim the premiere News Bulletin of Delhi Public School Panipat Refinery. This prodigal move is the index of our unprecedented growth acceleration of the DPSPR family.

“Diversity is the presence of light, Inclusion is the celebration of light”

The Editorial Board aims at fostering our highly revered core values “L.E.A.P” and deeply held convictions of creating inclusive and equitable environment. This bulletin endeavours to serve as an apparatus of preserving and celebrating the dexterity of the members of DPS,PR family that has enabled us to evolve and come together as a community.

To encompass the intensity of this year’s theme of ‘Saving the Planet’, we correlate the 5 elements of Earth Fire, Water, Air, Land and Space with Determination, Wisdom, Vision, Inclusive Growth and Adaptation respectively. But let’s understand why ‘Saving the Planet’ is our debutant message.

The natural world is an implausible wonder that inspires us all. It strengthens our economy, our society, indeed our very existence. Our forests, rivers, oceans and soils provide us with the food we eat, the air we breathe, the water we irrigate our crops with. We also rely on them for numerous other goods and services we depend on for our health, happiness and prosperity.

Hereby we intend to guide children, the future of the world, that valuing nature we can transform the way the environment is managed, delivering stronger environmental protection.

We hope to seize these snippets of life in the pages of Excelsior.

The Editorial Board awaits the initiative from the readers to incorporate the values and principles in their lives and carry a part of this Excelsior in their hearts.

We hope our readers rejoice as they leaf through the pages of the newsletter.

Seasonal Symphony of Spring

Annual Day Celebration Classes Nursery & Prep

Our Annual Day Presentation for Grade Nursery & Prep was a spectacular event featuring mesmerizing performances. The Principal, Surender P. Sachdeva welcomed Mrs. & Mr. M.L. Dahriya, E.D. IOCL, PR & PNC and Pro Vice-Chairperson, DPS Panipat Refinery. He highlighted L.E.A.P., the core values of our school.

Titled 'Symphony of Spring,' the event showcased Navroz, Holi, Sighmo, and Vishu Festival, with our tiny tots taking center stage. Their rhythmic performances vividly depicted spring's traditions through dance and theatrical vignettes. The audience joyously applauded, and Mr. Dahriya praised the children's passionate performances.

Seasonal Symphony of Spring

Annual Day Celebration Classes 1 & 2

Delhi Public School Panipat Refinery celebrated its Annual Presentation for Grade I & II on March 14th, 2024. The Chief Guests, Mrs. & Mr. T.K. Bisai (CGM, HR,PR) Panipat Refinery, received a warm welcome. The event began with reverence to Goddess Saraswati, followed by magnificent dance performances by the students of classes I and II. The awe-struck audience of IOCL dignitaries and parents cheered with round of applause for the tiny tots. In his address to the audience, the Principal, Mr. S. P. Sachdeva highlighted the importance of learning by discovery and exploration for children. He also enlightened everyone about the significance of positive gatherings and activities for children.

Cultivating Skill, Nurturing Future

The Dawn of A New Initiation (SESSION 2024-25)

What could be a better way to herald a new session than some potent interactions and fascinating activities? The youngest Dipsites had a thorough view of the campus along with some engaging and ice-breaking fun-filled sessions on 1 April 2024. The students were introduced to the art of learning as a jovial companion for life.

The exciting activities included games, singing, dancing and a friendly interaction with the Principal, Mr. S.P. Sachdeva.

Mother's Day

To celebrate the greatest power, the power of maternal love, DPS Panipat Refinery engaged the students in preparing a tribute for their Mothers.

Paying tributes to the divine powers of mothers, the tiny tots of classes Prep to II celebrated Mother's Day by presenting poems and speeches along with making special pieces of art for their mothers.

Learning is Fun

*Play is our brain's favourite way of learning.
We are never more fully alert, alive and
deeply engrossed in anything than when we
are playing.*

*The lifelong lessons of learning must
begin with love for it. So, the session
at DPS Panipat Refinery initiated a
series of fun filled multidisciplinary
experiences of learning across all
classes.*

ACCLAMATION

In John C. Maxwell's words, "A leader is one who knows the way, goes the way, and shows the way." The school witnessed an exemplary display of leadership at EleTS World Education Summit, when the Principal, Mr. Surender Pal Sachdeva graced the conference with his sagacious and eloquent oratory. This indeed remains one of the proudest and prestigious moments for DPS Paniapt Refinery, as he extended the vision and values of the school at such a prestigious platform.

67 Students Scored Above 75% **81.6%** Average Aggregate of School

9 Students Scored 100/100

Monthly Subject Enrichment Activities

Social Science Activities (April)

Social studies are significant in helping students become informed individuals with knowledge of politics, citizenship, cultural awareness and some general knowledge of world affairs. All of this information can teach learners to be more well-rounded individuals as they embark on life journey after they graduate high school. As a part of school's endeavor to foster leadership and social skills in the students, the Social Science department introduced various activities like India Super Power (VI), Codex Factory (VII), Tabloid Making (VIII) and Heritage India (IX & X).

English Activities (May)

These activities aimed at providing the ecstasy of expression and improving linguistic skills. The students were engaged in various activities like Narrative Reimagined, Soliloquy of Imagination, Argumentative Exchange, Interactive Dramatics/ Animated Artistry, TED Talk, Figurative Language Challenge and many more.. The sessions were spectacular and vivacious illustrations of students' creativity and enthusiasm.

Dedicated Assemblies

Basant Panchami and Saraswati Vandana

Invoking the Goddess of knowledge and wisdom, Goddess Saraswati, each student worshipped her idol and offered flowers.

Students then presented a Saraswati Vandana, expressing their gratitude to the Goddess.

Cleanliness Drive

Cleanliness is quintessential and an index of the development of society as a whole and its units. All the Dipsites pledged to make cleanliness a priority.

As part of the Swatchh Bharat Mission led by class 12, the school witnessed a cleanliness drive.

The drive began with an inspirational speech by the Principal, Mr. S. P. Sachdeva. The enthusiasm was reflected in the students' zest to clean up the school campus. The students learnt an important lesson about keeping their surroundings clean and the dignity of labour.

Delhi Public School Panipat Refinery Assembly on Special Cleanliness Drive

Partition Horrors- Remembrance Day

The partition was outlined in the Indian Independence Act of 1947. The violent nature of the partition created an atmosphere of hostility and suspicion between India and Pakistan that affects their relationship to this day. The students of Class X narrated the tragic facts engraved upon the bleeding hearts of the generations that suffered during the partition.

Yoga Day

Yoga is a way of life!

It has no religion. The students of DPSPR celebrated International Yoga Day on 2 June 2024. The students displayed their commitment to a healthy lifestyle.

Yoga helps us to connect to nature. Furthermore, our bodies become more flexible after consistent yoga practice. We also develop a strong sense of self-discipline and self-awareness. In a nutshell, yoga improves our overall well-being and provides better mental clarity.

Roadmap to Rewarding Careers & College Admits -Orientation Session for Grade X to XII

Mr. Abhishek Gupta, Founder & CEO of High School Moms, enlightened the students about ways to progress in their career. Another expert, Mr. Arindam Bhattacharya further emphasized of selecting the right stream and proposed some exciting career choices for students especially based on skills.

VISITOR OF THE WEEK

Visitor of the Week (VOW) Program invited Mr. Jitender Bahri, Head of P & C Reinsurance Solutions Operations & Site Lead for Hyderabad, to the school campus on 25 April '24. Mr. Bahri shared indispensable insights into modern innovations and emphasized the importance of staying informed and updated with technology for survival, better living, and sustainability.

SEMINAR ON HEALTHY EATING HABITS

On 30th April '24, Ms. Tamanna Narang conducted a rewarding seminar that instilled in the young minds a valuable lesson on eating right, emphasizing the importance of healthy dietary choices for overall well-being and long-term health.

Conscious Parenting

To provide incessant support to the students, a session to counsel the parents was organized. Exploring the advantages of Conscious Parenting, Mr. Chetan Jaiswal guided the parents on accentuating the distinctiveness and brilliance of their children. The major emphasis was on self-evaluation and empowering a healthy connection and communication with the child. The session culminated with Mr. S.P. Sachdeva, the Principal focusing on reinforcing constructive and open-minded parenting.

A Mega Cyclothon -2024

Inspiring the future generation to conserve energy and achieve health goals the school organized a Mega Cycle Rally in which students from classes VI to XI participated with full zest. The students took a pledge, read by Mr. M.L. Dahirya, (ED, IOCL, PR & PNC), Mr. T.K. Bisai (CGM HR, PR) to maintain cleanliness, achieve health goals, and inspire at least 10 people to take the same pledge. Then the ED accompanied by the Principal, the headmasters, and other refinery officials, flagged off the cyclothon.

The cycle rally was a part of the celebration for the Earth Day and Swatchhata Pakhwada in association with Panipat Refinery. The students enjoyed the bicycle ride under the supervision of teachers and conveyed the message of preservation of resources, maintaining good health and promotion of clean and pristine environment.

THE INVESTITURE CEREMONY (2024-25)

DPS Panipat Refinery witnessed a historic and heartwarming celebration recognising future leaders. The Investiture ceremony featured the felicitation of all the office bearers of the Student Council 2024-25 with sashes and badges. The Chief Guest, Mr. Vijay Kumar, Commandant, Central Industrial Security Force, Panipat Refinery addressed the student officials acknowledging them as future leaders.

A vivacious cultural program was the cherry on the top! The program began with a Ganesh Vandana followed by a sufi concert and felicitation of the new members of the DPS,PR Student Council. This was followed by planting of saplings, signifying Dipsites' commitment to a green and clean environment. A sapling was gifted to the chief guest as a token of gratitude.

DELHI PUBLIC SCHOOL *The Felicitation*

The Sufi Concert

The melodious singers and instrumental virtuosos presented a Sufi Song that mesmerized the audience.

The Tree Plantation

Following the tradition of formulating everlasting advantages, the program concluded with a tree plantation by the School Environment Committee.

Internship Initiative

A Visit to Panipat Institute of Engineering and Technology

In order to expose students to experiential learning and real professional scenarios, the school organized a visit to Panipat Institute of Engineering and Technology. Our students embarked on an enlightening journey, delving into cutting-edge technology and innovations that are shaping our future. From experiencing AI presentations to working on voice recognition projects, immersing themselves in virtual reality adventures, and exploring the wonders of 3D printing and laser cutting machines, every moment was a testament to the endless possibilities in education.

Inter House Toys From Trash Competition

In a vibrant showcase of creativity, our school Organised an Inter-House Competition centered around the theme "Toy from Trash." Students ingeniously repurposed everyday materials into imaginative toys. From cardboard, plastic bottle, plastic cap each creation showcased innovation and resourcefulness. The display at the Parent-Teacher Meeting (PTM) delighted attendees, highlighting the importance of sustainability and innovation in education.

10 Facts on Planet Vs Plastic

By Sanvika Prajapati (I B)

- Only 9% of all the plastic produced is recycled.
- A whopping 2 million plastic bags are used every minute worldwide.
- The average time that a plastic bag is used is just 12 minutes.
- One million plastic bottles are bought every minute.
- 73% of beach litter worldwide is plastic.
- Use of single use plastics is illegal in some parts of the world.
- Every minute of every day a truckload of plastic is dumped into the ocean.
- Upto 95% of plastic polluting the oceans is carried by 10 rivers.
- According to the statistics, 99% of seabirds will be eating plastic by 2050. Also there could be more plastic than fish in the ocean by 2050.

Saving the Planet

By Abhilasha Singh (XII D)

"We do not inherit the Earth from our ancestors; we borrow it from our children" — Native American Proverb

Imagine waking up one morning to find the sky to be a permanent shade of oppressive grey and brown as a result of industrial emissions. The air thick and heavy engulfed in the acidic smell of pollution, burning your lungs with every breath. What if water bodies were devoid of marine life? Or the life supporting rivers were bearing the burden of human excess marked by the oily sheen and plastic debris floating on its surface. What if the chirping of birds and rustling of leaves were replaced by the relentless hum of engines and machines?

This descriptive vision is not a far-fetched science fiction nightmare, but a possibility that can manifest itself into the reality any day from now if certain trends continue unchecked and we remain exploiting Earth's resources.

Before expanding upon this further, it's imperative to establish an understanding of what does 'Saving the Earth' truly mean?

It is beyond the mere call to preserve the ecosystem and repair environmental damage.

It is an act of redemption. It requires us to confront the consequences of our past actions, attune to our ethical duty to ensure a sustainable future for all living beings and commit to respect and cherish our shared home and foster a harmonious relationship between nature and humanity.

Let's dive into the heart of the planet's plight, ruminating the power of our actions and underscoring the urgent need for change. Let us approach the discourse with the gravity and seriousness it deserves.

Understanding the crisis

Current environmental issues encompass climate change, biodiversity loss, deforestation, pollution, and depletion of natural resources. Climate change, primarily caused by greenhouse gas emissions from human activities, is resulting in rising global temperatures, altered weather patterns, and sea-level rise. Biodiversity loss is accelerating due to habitat destruction, invasive species, overexploitation of natural resources, and climate change itself. Deforestation, driven by agricultural expansion, logging, and infrastructure development, disrupts ecosystems and reduces carbon sequestration capacity. Pollution from industrial activities, agriculture, and urbanization contaminates air, water, and soil, posing threats to human health and ecosystem integrity. Additionally, the depletion of natural resources such as freshwater, minerals, and fossil fuels exacerbates environmental pressures and sustainability challenges globally. Linking back to our initial premise, I suppose you may be wondering

How can we help safeguard the future of the planet?

- *Embrace the 3Rs : embrace the three mantras of reduce, reuse and recycle to minimize waste and maximize waste efficiency.*
- *Grow Your Own Greenery : Start your own garden or join a community garden to grow your own vegetables and herbs, reducing reliance on industrial agriculture.*
- *Shower the Earth with Care : Conserve water like it's the world's most precious commodity—because it is.*
- *Move Green: Whether by pedal power, public transit, or electric wheels, choose transportation that treads lightly on the planet*
- *Fashion with a Conscience: Choose eco-friendly fashion by supporting brands that prioritize sustainable materials and ethical practices.*
- *Unplug and Unwind: Reduce energy consumption by unplugging devices when not in use and enjoying screen-free time with nature*
- *DIY and Upcycle: Get creative with DIY projects that upcycle old materials into new, useful items, reducing waste and fostering innovation.*

I urge you to rise to this challenge with courage and creativity, recognizing that every small action contributes to a larger movement. The time to act is now, for the future of our planet lies in our hands.

Will we choose to be the generation that turned the tide, or the one that stood by as the Earth cried out for help?

Together, we can turn the page to a new chapter of environmental stewardship, ensuring a thriving planet for generations to come.

Earth- Life, Problems and Plastic

By Avika Makloha (XI D)

From the depths of the Challenger's Deep to the unyielding peaks surrounding Mount Everest, one can, without a doubt, say that life on earth is not boring. Seeing the jungles of the Amazon, brimming with life, and the solace provided by the deserts of Egypt, there is no shortage of wonders to be experienced and anecdotes to be shared.

But in staring at your mobile and out into the world, busy with the daily riff-raff of life, it is easy to forget that life on Earth may not always remain amazing. The chasm between humans and the Earth is widening with each plastic bottle that makes it into landfills, making the idea of 'Healthy Earth' seem like a faraway dream. Our planet is battling with an endless number of difficulties: global warming, biodiversity loss, climate change, water, land and air pollution, the list goes on and on. But what is interesting here is that most of these issues are interconnected and can be traced back to a multitude of causes, the most prominent one being plastic.

Plastic, as we all know, can take a long time to decompose, starting from a measly 450 years to a devastating never. The presence of plastic is a constant torment for the ecosystem, causing habitat destruction, food web disruption, and land, air, and water pollution. The disposal (generally consisting of incineration) of plastic as well as its production lead to the release of greenhouse gases like carbon dioxide, hence aiding in climate change and ultimately increasing the carbon footprint.

The empirical torment of mother nature may not be reversible but to make virtue of necessity we ought to make changes in our regime by encompassing the 3R rule. I urge the youth to be mindful of their surroundings and try to help others understand the sheer gravity of the situation. Abandoning single use plastic products and encouraging cloth bags and stainless steel bottles are the rudiments to further stepping stones in eliminating plastic use.

The appalling sight of heaps of plastic that mar the beauty of nature. So, with prevention and cure, let us take to saving the earth, one paper straw at a time.

The Earth's Plea: The Tale of Planet vs Plastic

By Sushi Chudhary (VIII D)

In a galaxy not far, far away,
A planet called Earth had something to say.

It whispered to oceans, mountains, and trees,
"There's a menace among us, not a disease."

Plastic, oh plastic, so useful, so bright,
It makes our lives easier, it's light and it's tight.

But it's piling and swirling in landfills and seas,
Choking our turtles and tangling our bees.

Once upon a time, we danced with delight,
With bottles and bags that were shiny and light.

But the Earth, with a frown, started to see,
This plastic invasion was far from debris.

"O humans," she said, with a voice soft and grand,
"Can you see how this plastic is harming our land?"

It's durable, sure, but it sticks like a pest,
From the depths of the ocean to the eagle's high nest."

The dolphins did flip, the whales gave a spout,
"The ocean's our home, please help us out!"

The mountains echoed, "We too, feel the pain,
With plastic pollution, it's hard to sustain."

So the humans, quite clever, thought up a plan,
To reduce all the plastic, as much as they can.

They started recycling, reusing, and then,
They turned to their planet, and gave a big grin.

"We'll make bioplastics from corn and from wheat,
We'll clean up our beaches, our rivers, our streets.

With metal and glass, and bags we can use,
We'll lighten your burden, there's no time to lose!"

The Earth gave a sigh, a twinkle in the sky,
Her rivers ran clear, her forests stood high.

For together, you see, we can all lend a hand,
To protect our dear planet, our beautiful land.

So here's to a future, that's brighter and green,
Where plastic's a memory, not something we've seen.

With effort and heart, and a sprinkle of magic,
We'll turn the tide on this plastic so tragic!

HANDS HARMONY

गाँव की यादें

वह गाँव की यादें, होती हैं बड़ी मजेदार
नदी से मिलता पानी, पहाड़ों से मिलता प्यार।
मन करता पेड़ों के पास जाऊँ हर बार
वह शाम आती यादें बार-बार।

शहरों के शोर से मेरा जी घबराता
पहाड़ों का वातावरण मुझे बहुत भाता।
प्लास्टिक के ढेर को देख दुखी मन होता
सब साथ दें तो ये खत्म होता।

मानस्वी शर्मा
छह -द

धरती को बचाएँ

नदियों में ना कचरा बहाएँ
सागर के जीवन को बचाएँ।

पेड़ों को कटने से बचाएँ
धरती को फिर सुंदर बनाएँ।

पॉलिथीन में ना सामान लाएँ
घर से थैला लेकर जाएँ।

सबको जल का महत्व बताएँ
पानी को ना व्यर्थ बहाएँ।

जल, वायु को शुद्ध बनाएँ
आओ सब धरती को बचाएँ।

राहिब खान
पाँच -द

कविता

प्लास्टिक को दूर हटाओ
कागज जूट को अपनाओ।
जहरीला है इसका रंग
धरती को कर दे बदरंग।

डॉक्टर बार-बार बतलाएँ
प्लास्टिक से कैंसर हो जाए।
जले तो धुआँ फैलाए
कहीं दम ना घुट जाए।

कभी ना करो इसका उपयोग
इससे पनपें अनेकों रोग।
जब भी आप बाजार जाएँ
थैला कपड़े का ही अपनाएँ।

धैर्य श्रेष्ठ रावत
छह -स

प्लास्टिक

दृढ़ संकल्प करेंगे अब हम, दृढ़ संकल्प करेंगे,
प्लास्टिक की वस्तुओं को ना स्पर्श करेंगे।

ना जल में ना मिट्टी में यह विघटित होता जाकर,
वसुधा की उर्वरता को रख दिया है इसने घटाकर।

जो कहते हैं दुर्गम इसके बिन जीवन अब होगा,
जूठ और कागज की खूबियों को उन्हें गिनाना होगा।

करो यह प्रण थैला लेकर अब हम घर से निकलेंगे,
जब देगा कोई प्लास्टिक उसको ना स्पर्श करेंगे, हम तो
ना स्पर्श, करेंगे हां भाई ना स्पर्श करेंगे।

अक्षित सिंह
कक्षा 11 (ब)

प्लास्टिक के प्रयोग पर प्रतिबंध (लेख)

प्लास्टिक के उपयोग पर लगाया गया प्रतिबंध एक महत्वपूर्ण विषय है जो हमारे समाज और पर्यावरण के लिए गंभीर मुद्दा है। प्लास्टिक की अधिकतम उपयोगिता के कारण ही इसने हमारे प्राकृतिक संसाधनों और पर्यावरण को अपने रंग में बदल दिया है। इसके अस्तित्व से होने वाले अस्थायी और नकारात्मक प्रभावों को देखते हुए विभिन्न देशों ने प्लास्टिक के उपयोग पर प्रतिबंध लगाने का निर्णय लिया है। इस प्रतिबंध का एक ही मकसद है- प्राकृतिक संसाधनों को सुरक्षित करना और पर्यावरण को स्वच्छ बनाना। यह हमें समय अनुसार वैकल्पिक पदार्थ का उपयोग करने के लिए प्रोत्साहित करता है जो हमारे भविष्य को स्वस्थ बनाने में मदद करेगा।

एषा मम धन्या माता ।

या मां प्रातः शय्यात्
जागरयति सम्बोधनतः
हरिस्मरणं या कारयति ।

आलस्य मम् नाशयति ॥

एषा मम धन्या माता ।

कुरु दत्तं गृहकार्यम् त्वम्
कुरु सुत./पाठभ्यासं त्वम् ।

आदेश ददति एवम् .

योजयते कार्ये नित्यम् ॥

एषा मम धन्या माता ।

मधुर दुग्धं ददति या
स्वादु फलं च ददति या ।

यच्छति महान् मिष्टान्नम्
यच्छति महान् लवणत्राम् ॥

एषा मम धन्या माता ।

कार्यं सम्यकं न करोमि यदा,
अपराधं विदधामि यदा ।

कलहकुर्वन् रोदिमि यदा,
तदा भ्रंशं मा तर्जयति या ।

एषा मम धन्या माता ।
